

Not to travel abroad recommendation 2020.03.17.

Dear Students,

the clear and strong recommendation of the UPFHSc, is **not to travel abroad** in the upcoming weeks!

Flights and airports are probably the most dangerous places to go at the moment (confined places, huge number of people). For this and other reasons we highly recommend not to travel back to your home country or any other places! Not even during your free time. If you still decide to travel we cannot guarantee that you can come back to Hungary and progress with your studies appropriately! And even if you will manage to return back to Hungary you will have to follow the regulations valid at the time regarding self-isolation/quarantine. The corresponding regulations are present and will be updated regularly on UP website.

We suggest that you use the time during this period for learning, education purposes.

For the upcoming period - following the one-week spring break - a distance learning system will be established and communicated amongst the students in appropriate time. Remember, that those who already went abroad and are returning back are obliged to inform the UPFHSc, stay at home, call the corresponding hotline (+36 30 577 3764) and follow strictly the obtained instructions. They must avoid public places!

Please keep in mind that everyone is personally responsible for the compliance of the above detailed regulations, not keeping them is considered infringement and the endangerment.

Please keep in mind, that the UPFHSc doing everything to ensure the possibility to take your exams later on, even not with the usual methods and timeframe, in order to ensure you the possibility the successful semester!

Best regards:

Dr. habil András Oláh
