

hygienic tasks of examinations 2020.05.06.

Dear Students,

We would like to inform you that the University of Pécs issued procedures for the hygienic tasks of examinations requiring personal presence.

In accordance with the procedures, the following hygienic measures apply to exams requiring personal presence:

- The University centrally provides personal protective equipment (face masks) for lecturers, students, administrative staff and faculty assistants.
- The department organizing the exam checks the conditions for admission to the examination under its own authority for prevention (e.g. health status, body temperature, etc.).
- Continuous or frequent airing in the examination room, in the room designated for students to wait, and in the lavatories.
- Disinfectant cleaning in all areas used by either the examiner, or the students. Cleaning also includes all items of equipment that the candidate touches (e.g. door handles, chairs, switches, etc.).
- Continuous cleaning and airing of lavatories.
- Refill of the installed hand sanitizer dispensers.
- Where devices are used consecutively by candidates during the practical exams, they must be disinfected after each use. In such cases, we recommend that candidates disinfect their hands before and after use.

During the examinations, the reception service will provide directions in case of questions.

We ask our students to take due care during the exam to protect themselves and others!

We wish you a successful exam period!
