

Thesis Topic		Supervisor
1	Chronic diseases - nutrition/nutritional status, lifestyle, quality of life	dr.Breitenbach Zita
2	Circadian rhythm - lifestyle, eating habits to chronic diseases with musculoskeletal diseases patients)	
3	Application of movement therapy interventions in injury prevention and development of sport-specific parameters among athletes and its border areas rehabilitation	dr.Tardi Péter
4	Communication problems with patients due to language differences	dr. Simon Klára
5	.Examining effect of relaxation technique in different clinical areas	dr. Hock Márta
6	Examination of quality of life and physical activity of male and/or female patients suffering from different type of incontinence	
7	The effects of physiotherapy on quality of life of patient with lung diseases	
8	Physiotherapy treatment options for oncology patients	
9	Effects of physical activity on quality of life of oncology patients	
10	Patient rights in 21st century healthcare	dr. Novák Pál
11	The most topical issues in health ethics	
12	Why the social sciences are neglected in health science thinking	
13	The interface between ethics and law in health care systems	
14	Effects of video games on the psyche, possible cases of addiction advanced health sciences?	
15	The moral status of patients	
16	The moral status of health workers	

17	Comparison of ventilation thresholds and lactate thresholds in different endurance sports.	dr. Melczer Csaba
18	Comparison of anaerobic capacity and oxygen consumption among representatives of different strength sports.	
19	Changes in spiroergometric parameters (VO ₂ , VCO ₂ , VE) under the influence of different training methods (interval, endurance, strength)	
20	Gender and age differences in spiroergometric stress tests	
21	Comparison of on-field test results with laboratory test results (spiroergometry)	
22	Comparative analysis of bone density among strength and endurance athletes.	
23	EMG examinations in populations of different ages and conditions.	
24	Strength training and body composition change study	
25	Analysis of the relationship between flexibility and posture	
26	Physical activity study among overweight people	
27	Physical activity examination among different ages	
28	correlations and therapeutic options between chronic musculoskeletal pain and psychological status (anxiety, depression, kinesiophobia)	Dr. Varga Veronika
29	The effect of physiotherapy supported by rhythmic auditory stimulation on motor-cognitive dual-task performance and postural control	
30	Biomechanical analysis and prevention of specific occupational injuries and myofascial dysfunctions in performing artists (musicians, dancers, actors)	
31	Investigation of the functional correlations between pelvic floor functions and global kinetic chains (core stabilization, respiratory mechanics, postural control)	
32	The biopsychosocial mechanism of pelvic floor dysfunctions: investigating the correlations between pelvic floor functions, mental status, and quality of life in the workplace	
33	balneotherapy interventions and their role in the complex physiotherapeutic management of chronic musculoskeletal disorders	
34	Investigating the Relationship Between Health Anxiety and Cyberchondria	Dr. Hideg- Fehér Gabriella
35	The Role of eHealth Literacy in Online Health Information Seeking and the Development of Health Anxiety	
36	The Relationships Between Physical Activity, Psychological Well-Being, and Health Anxiety	
37	Investigating the Relationship Between Self-Rated Health and Health Anxiety	
38	The Relationship Between Health Consciousness, Online Health Information Seeking, and Cyberchondria	

39	Application of massage therapy in various medical conditions	Tumpek Nikolett
40	Prevention and rehabilitation in aesthetic sports	
41	Prevention and rehabilitation of cardiovascular diseases	
42	Posture assessment and spinal health programs	
43	Examination and treatment of the cervical spine	
44	Investigation of the effectiveness of dance-based movement programs	
45	Assessment and treatment of hypermobility	
46	Prevention and Rehabilitation for Athletes in Team Sports	Imhoff Viktória
47	Prevention and Rehabilitation for Athletes in Water Sports	
48	Physical Therapy for Cardiovascular Diseases	
49	Physical Therapy for Pulmonary Diseases	
50	Physical Therapy for Endocrine Diseases
